Thanks for the information, Carl.

Julian will provide Ken and Joe with a step-by-step set of instructions after I QA them.

We'll "cc" you and Allan so you can see what we need to get things rolling.

Thanks, again. We should get instructions out to everyone next week.

Subject: RE: AS ocean dumping data

As I understand it, the operator of the sludge vessel does the water quality monitoring, provides the information to Starkist whose lab does the analyses, so this would be shared information, not reported separately. For the on-site storage, that is reported separately.

I have spoken with Ken from COS and he definitely needs directions and assistance. Joe Carney from SK is back on island.

My suggestion is that if you folks would like them to implement using the recently developed database, you need to provide clear and step by step orders and direction to Ken and Joe, otherwise they are unclear what precisely is required of them for data entry and the consequences of not entering the data. Since this is a EPA requirement perhaps Allan can provide them this directive. They respond well to authority.

In my conversations with canneries folks, they work nearly 24/7, and they initially need frequent reminders when they have a change in duty, especially when it does not involve business operations. Ken and Joe will do what you want, but they need technical assistance, and attention.

Give them your assistance and direction by the numbers, advise them on when they should be entering the data. That works for them.

RE: AS ocean dumping data

Thanks, Carl

So in the past, they each entered the data separately for the offshore sampling?

Subject: AS ocean dumping data

Importance: High

Hi Steve,

Well, one minute it is sunny then next minute we can get 5 inches of rain in one hour. Without looking at the skies, you observe a darkening and then hear the classic sound of a downpour in the distance, and you flee for cover.

I contacted representatives at COS and SK. The gentleman from COS basically said he will need time and help to enter data as he is extremely busy with keeping COS in business. I have left two messages with the gentleman from SK, and he has not returned my call. This usually means he is off-island.

The contact persons for this work are:

COS
Kenneth McCleod
Utilities Manager
kmcleod@sampac.com
684-644-5272

StarKist
Joe Carney
Facilities Engineer

Hi, Carl

How is the weather?

Julian Race is the programmer of the on-line fish waste entry form. Recently, he's modified the site (see attached link below), and needs some feedback to complete the on-line disposal site monitoring page. Can you find out who acquires the data, and who would be entering them?

Thanks

Steve,

I have some questions for the EPA to answer. I am curious how the process works for the disposal site monitoring - can you get an overview from the EPA. Also, who does the actual disposal site sampling? EPA? The canneries? The captain of the ship? I need to know so that I can develop some sort of protection for the data input so that we can control who can enter and modify what data.

Here is a link to "Rev 2" of the beta site

<http://fwdb.adiss-afiss.com/default2.aspx>

Note the interface has been cleaned up and the data entry/reporting modules arranged in a neater fashion.

thanks

Julian Race
